

POLY-MART 125 GALLON LIQUID STORAGE TANK

Poly-Mart offers a line of Vertical Liquid Storage Tanks with a specific gravity of 1.5 & 1.9. Specific gravity is the ratio of the density of a substance to the density of a reference substance. The reference substance is water for liquids. A 1.5 specific gravity means you can store liquid 1.5 times as dense as water. Substances with a specific gravity of 1 are neutrally buoyant in water. Those substances with a specific gravity of greater than 1 will sink in water, while a substance with a specific gravity of less than 1 will float in water. Our line of Plastic Storage Tanks is generally used for the bulk storage of Water, Liquid Fertilizer, Farm & Agriculture Chemicals, Industrial Chemicals, Reverse Osmosis Systems, Soap, Cleaning Agents, Waste Vegetable Oil and more. Our Plastic Storage Tanks are a translucent white color for ease in level viewing and are also equipped with gallon markers. Our Plastic Storage Tanks come with a vented slosh proof lid, inlet bulk head fitting, an outlet bulkhead fitting and an outlet plug. Upgraded Bulkhead Fittings & Gaskets are also available for order. 1.5 & 1.9 Specific Gravity tanks can also be ordered in Black.

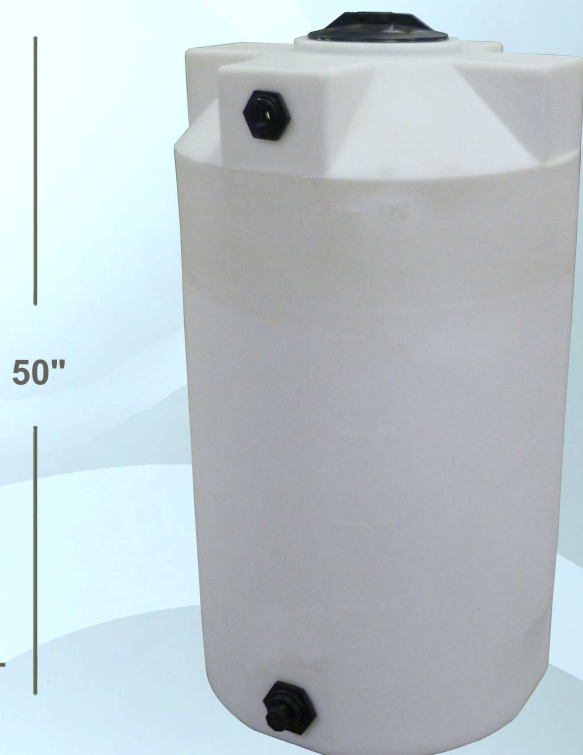

FEATURES

- *Poly-Mart 5 Year Warranty
- *125 Gallons of Capacity
- *30"D x 50"H
- *8" Lid w/ Air Vent
