

Installation Instructions: Riser Pan

Figure 1:
Set Riser Pan on floor or other suitable surface for pouring concrete. Pour concrete up to level of flat ring and insert handle.

Figure 2:
When concrete has set, Riser Pan may be cast into septic tank or placed anywhere in the riser column as shown in Figure 5 and Figure 6.

Figure 3:
To cast Riser Pan in tank, place riser pan on top of tank form with concrete lid in place.

Figure 4:
After concrete sets, tank is ready for a water-tight lid or stackable riser (shown in Figure 5).

Figure 5:
Riser Pan and concrete lid shown cast into tank with Riser (cutaway) and Riser Lid.

Figure 6:
Riser shown cast into tank with Riser Pan, concrete lid, second Riser, and Riser Lid.
*Seal with Conseal butyl rope.
