GRAF Carat S 1700 Gallon Underground Tank Specifications:

1. Variable burial depth: 30” to 42” (59” Max. with APP BY: SH.
2. Can be expanded as required.
3. Secure investment with market leading 15-year warranty. Made from high quality Duralene; easy to recycle.
4. Can be expanded as required.

GRAF Optimax High efficiency, Self-Cleaning, In Tank Filtration System:

- Filter specially developed for rain water harvesting
- Low maintenance; self cleaning
- Only 6.5” height offset between inlet and outlet
- 0.35mm (0.01”) mesh filter
- Transparent cover for easy maintenance
- Self-cleaning filter
- Max. 3,750 sq. ft. with 4” connections
- Over 95% yield
- Space saving filter technology integrated in the tank
- Over 95% yield
- Transparent cover for easy maintenance
- Self-cleaning filter
- Max. 3,750 sq. ft. with 4” connections
- Space saving filter technology integrated in the tank

Tank height should be set and plumbing pitched to best utilize existing grade. A site assessment should be done prior to installation to determine the optimum levels for filter and plumbing so as to provide positive drainage to tank and stormwater overflows.
