

### Electronic Control Board Replacement - RainFlo 115V Automatic Pump Controller

1. Disconnect the power supply.
2. Remove the front cover.
3. Disconnect three wires from power supply and three wires from pump.
4. Remove two mounting screws from board. Note the orientation for reassembly.
5. Once removed, pull out the three LED lens posts from old board and install new board. You may need to pull gently with small pliers.
6. Install new board in controller and reconnect the three power supply and three pump wires.
7. Reinstall the front cover.
